

FPS™

Emergency Fuel Treatment (EFT)

DIESEL FUEL ADDITIVE

FUEL PERFORMANCE SOLUTIONS

FPS Emergency Fuel Treatment is formulated to help eliminate moisture from diesel fuel storage tanks and vehicle tanks. It is a hydrophilic product that will allow moisture to become soluble in diesel fuel and pass through fuel systems without freezing. Used as recommended, it will help eliminate fuel icing which leads to fuel filter plugging.

FPS Emergency Fuel Treatment should be used in northern climates by adding to storage tanks in the fall after all accessible free water is removed. It should also be added to vehicle tanks seasonally in conjunction with fuel filter change-out so that all water is removed from fuel systems before sub-freezing temperatures are encountered. This product can also be used to de-ice fuel filters in stalled vehicles.

Benefits:

- ✓ Disperses moisture in fuel storage tanks
- ✓ Helps eliminate filter icing
- ✓ Contains no harmful alcohols
- ✓ For use in all diesel fuels and bio-diesels

Recommended Treatment Ratio:

- ✓ Pre-winter shock treatment: 1 gallon of **FPS Emergency Fuel Treatment** treats 1000 gallons of diesel fuel
- ✓ Vehicle Tank Treatment: 13 ounces of **FPS Emergency Fuel Treatment** treats 100 gallons of diesel fuel
- ✓ Maintenance Moisture Control: 1 gallon of **FPS Emergency Fuel Treatment** treats 5000 gallons of diesel fuel.

Package Sizes:

2.5-gal Jug; 55-gal Drum; Bulk Tote
